## Care of the Instrument

- Always open with case on the *floor* .
- The reed and mouthpiece tips are very fragile, take care not to break them
- Swab the clarinet after each use
- **DO NOT** oil the keys unless instructed to do so by your teacher
- Do not wash your clarinet in water
- Keep the corks greased regularly to avoid drying out and breaking
- Keep 2 or 3 reeds "broken in" and rotate your practice time between them
- Care should be taken not to bend the bridge key when assembling
- Do not try to repair your instrument without contacting your teacher or the music store
- ***DO NOT put your instrument together until your music teacher shows you how!!!***
